

1 KINDS OF PLANTS

Trees

We visit gardens and parks.
We see many types of plants.
Plants are living things.
Big and tall plants are called **trees**.
They have strong woody stems.
They can stand erect.
Peepal, banyan and mango are trees.
Neem, fir and palm are also trees.

FIR

MANGO

PALM

Shrubs

Small bushy plants are called **shrubs**.
They have hard stems.
They have many thin branches.
These branches grow close to the ground.
Like trees, shrubs can also stand erect.
Rose, *bougainvillea* and jasmine are shrubs.
