Living and Non-Living Things

Come out of your house and look around. You will see a number of things. There are houses, trees, roads, animals, cars, stones, cycles, benches, soil, the sun and water.

Some of these things are made by man and some are not made by man. Write their names in these two columns.

Things made by man	Things not made by man
Table	Sun
house	Trees
car	sky
bicycle	river
bench	dog
clothes	clouds
windows	hills

Plants and animals grow, move, take food, breathe, feel and reproduce in different ways.

What you have learnt

- There are two kinds of things in our environment—natural and man-made.
- There are living and non-living things among natural things.
- Man-made things are all non-living.
- Living things grow, move, need food, breathe, feel and reproduce.
- Animals and plants do these things in different ways.

Work Time

A. Match the following:

Column A

1. Cockroach
2. Snakes
3. Living things
4. Food

Column B

- (a) Crawl 2
- (b) Energy 4
- (c) Spiracles 1
- (d) Breathe 3

B. Fill in the blanks choosing correct word.

1. Sunflower turns its face towards the sun. (Sunflower/Lotus)
2. A fish breathes through gills. (Spiracles/Gills)
3. Plants take in air through stomata in their leaves. (Stomata/Nose)
4. Touch-me-not plant closes its leaves if you touch it. (Lotus/Touch-me-not)
5. Birds and lizards lay eggs. (Birds/Lizards/Plants)

C. Answer the following questions: *INC.w (notebook)*

1. What will happen if an animal does not eat and breathe?

2. What do animals use their sense organs for?

3. How do plants produce new plants?

4. Where do plants get their food from?

5. What will happen to a chair if it becomes a living thing? Write any three possibilities.

6. Give three differences between plants and animals.

Higher Order Thinking Skills (HOTS) *in C.w*

1. Buses and cars move from one place to another. Are they living things?

2. A table is made up of natural wood of tree. What is the difference between table and tree (living or non-living)?
