Answer- Key-Ch. Poem 6. Shooting Star

Q1. Answer the following questions:

i. What does the poet see in the night sky?

Ans-The poet sees a shooting star in the dark night sky. It moves very fast across the sky. The sight fills the poet with wonder. It looks beautiful from far away.

Ans _____

ii. How does the poet describe the movement of the shooting star?

Ans-The poet says the shooting star is whizzing across the sky. It moves quickly and brightly. Its movement catches the poet's attention. It looks magical as it passes.

Ans _____

iii. What playful ideas does the poet have about the star?

Ans-The poet imagines the star as a happy one. She thinks it might be turning cartwheels in the sky. These ideas make the star seem playful. They show the poet's imagination.

Ans _____

iv. Why is the star called adventurous?

Ans-The star is called adventurous because it wants to learn to fly. It leaves its usual place in the sky. It seems eager to explore new places. This makes it brave and adventurous.

Ans _____

v. Why might the shooting star want to find another galaxy?

Ans-The poet feels the star may be bored of its place. It wants something new and exciting. So, it races across the sky. It may be searching for another galaxy to stay in.

Ans _____
