Paragraph Writing:-

My Favourite Summer Activity

My favourite summer activity is swimming because it is both fun and refreshing. During the hot summer days, the cool water makes me feel relaxed and happy. I usually go to the swimming pool in the

morning with my friends. We enjoy splashing water, playing games, and practicing different swimming styles. Swimming also keeps my body fit and active, which is very important for good health. My parents always remind me to follow safety rules, like not running near the pool and staying in safe areas. I feel proud when I learn new swimming skills and improve my confidence. Sometimes, we even have small competitions, which make it more exciting. After swimming, I feel fresh and energetic for the rest of the day. This activity makes my summer holidays enjoyable and healthy, and I always look forward to it every year.
