Q-11 Case Study: Saving water in Riya's village

Riya lives in a small village where people use a well and a hand pump for water. During summer, the water level becomes very low. Riya noticed that some people leave taps open and waste water while washing clothes.

One day, Riya and her friends decided to take action. They told villagers to close taps properly, use buckets instead of pipes, and keep the water sources clean. Slowly, people started following these good habits. After some time, the village had enough clean water for everyone.

1. What sources of water were used in the village?

2. What problem did Riya's village face?

a. Water shortage

d. Dirty roads

c. Too much rain

3. What good habit did Riya suggest?

a. Leaving taps on

b. Closing the taps properly

c. Using more water
