

CHAPTER

5

Wild Animals

We Already Know

- Some animals live in forests.
They cannot be tamed.

We Will Learn About

- What are wild animals
- What wild animals eat
- Homes of wild animals

Exercises

A. Fill in the blanks. Choose words from the box.

skin grasslands eggs plants web

1. Wild animals live in forests, grasslands and other places.
2. The home that a spider makes is called a web.
3. Snakes are killed for their skin, which is used to make leather.
4. Birds make nests when they have to lay eggs.
5. Zebras and deer eat only plants.

B. Put ✓ for True and ✗ for False.

1. All animals build homes for themselves. ☒
2. Only those animals that live in forests are called wild animals. ☒
3. Some wild animals live in groups. ☒
4. Vultures mainly eat animals already killed by other animals. ☒
5. Once a bird makes a nest, it lives in it always. ☒

E. Answer these questions. [IN N.B.]

1. What are wild animals? Give three examples.

.....
.....

2. Why do we say that hyenas and vultures help to keep forests and grasslands clean?

.....
.....

Thinking Skills

21st CS

1. What do you think will happen if we kill all animals that eat the bodies of dead animals?

Then there will be nobody to eat the dead animals. The dead bodies will keep rotting and dirty the forest.

2. Where can you find wild animals in a city?

We can find wild animals in a zoo.

3. Compare any two similarities and the differences between these two animals.

Both lion and giraffe are wild animals. Both live in jungle. Lion eats flesh of other animals and giraffe eats leaves of the plant. Lion is a carnivore, giraffe is a herbivore.

LEARNING BEYOND CLASSROOM

LS

Have you visited the zoo and enjoyed looking at the animals there? Now think how an animal feels when it is locked up in a cage. Would it be happy?

Do you think it is right to keep them in cages?
