

4. Click on files in the order in which you want them to display as slides. When you click, a **digit number** appears on the file which lets you know in which order this file will be displayed.

5. Click on **Sliding Scale** to adjust the speed of the slide show, from the slowest (left) to the fastest (right).

6. Click on **Play** button.

After clicking the **Play** button, the selected files start running one after another in the speed you have selected in step 5.

It is the story of a jungle in eight slides. In this story, the animals are coming one by one to eat grass. Suddenly, a tiger comes and all the animals begin to run away.

Now I Know!

After reading the chapter, I know these points:
