Q-8 Easy Study.

Priya had two weeks to finish her science fair project, but she wasted the first ten days playing games. When she realized she was running out of time, she immediately created a simple daily schedule to manage her work. She prioritized her main experiment first and used fixed 30-minute study blocks to stay focused without distractions. By sticking to her new routine, Priya finished her project on time and learned that planning ahead prevents unnecessary stress.

Questions

1. What time management strategy did Priya use to finish her work on time?

Priya created a simple daily schedule, prioritized her main experiment first, and used fixed 30-minute study blocks to stay focused without

2. How would planning her schedule on the first day have helped Priya? distractions.

Planning her schedule on the first day would have allowed her to complete the project smoothly over two full weeks, avoiding last-minute rush, stress and panic.
